NAMIT

MERN DEVELOPER

About Me:

I am a B.Tech in **Computer Science and Engineering** degree holder(2020-2024).Qualified **GATE 2023 &2024**.

My recent apprenticeship at **GeeksforGeeks** allowed me to enhance my problem-solving skills and gain hands-on experience in creating high-quality technical content.

GeeksForGeeks apprenticeship at gfg headquarters,Noida,sector 136

Projects:

Mobizz: An Internet MOVIE DataBase

- This is an interactive website build using **ReactJS** and **Redux toolkit (RTK)**for central state management.
- I have used **TMDB** website for the **API** of movie/series Data.
- Implemented many interactive features like **carousel** ,**trending** bar,etc and it is also responsive
- It is Deployed using Vercel

Blogging website(Jot Me Down): A full Stack App

- This is a Full Stack **MERN** application with lots of features
- For authentication and authorization, I have included Registration/SignUP and LogIn pages
- **JWT** token is used for **Authentication and Authorization**
plus cookie-paser is used to parse the cookies.
- **Multer** is used for uploading files in NodeJS applications
- **Cloudinary** is used for **image storage** on cloud
- Deployed using **vercel** for Frontend && **render.Com** for Backend(**CI/CD**)
